

New Planero Tall Units

Pull Out Pantry in Planero Style

VS TAL Larder in Planero Style

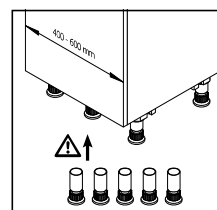

The VS TAL Larder system, with its durable European design, offers optimal storage space and simple installation.

The full pull-out pantry unit, with elegant and streamlined design, allows ready access to the contents of every basket.

Smooth operation of rails is supported by new roller bearings, automatic closing and enhanced profile geometry.

Installation is simple with the Easyfit Click system for assembling the frame on the lower and upper slides.

A new upper damper improves damping characteristics and performance. Now available in Planero, a contemporary, streamlined style with premium looks and manufacturing values.

NB: To avoid base panel sagging, sufficient support for the cabinet base is required directly under the mechanism runner. Warranty depends on adequate support being installed with pantry.

YES! You can order additional baskets for this item.
