

# Fasteners & Connectors

## OVVO®

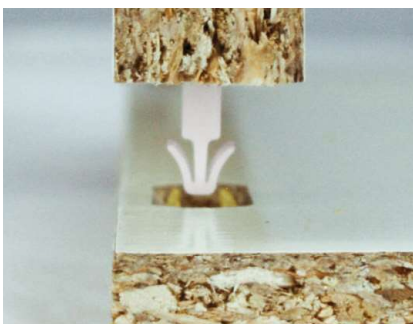

Ovvo® invisible connectors utilise the Ovvo® push-click-connect system, which was developed with expert industry input to increase production efficiencies and decrease assembly time and transportation costs.

Made in Ireland, the OVVO® award-winning invisible connector range:

- Joins material without use of tools, glue or screws
- Covers boards of different thicknesses and materials
- V-0930 range best for 12mm boards. V-1230 range best for 15mm, 16mm and 18mm boards
- Is designed to work across a range of joint angles
- Is available in RELEASABLE and PERMANENT versions
- Joint strength surpasses industry standards and requirement (verified by independent testing)

### V-Range

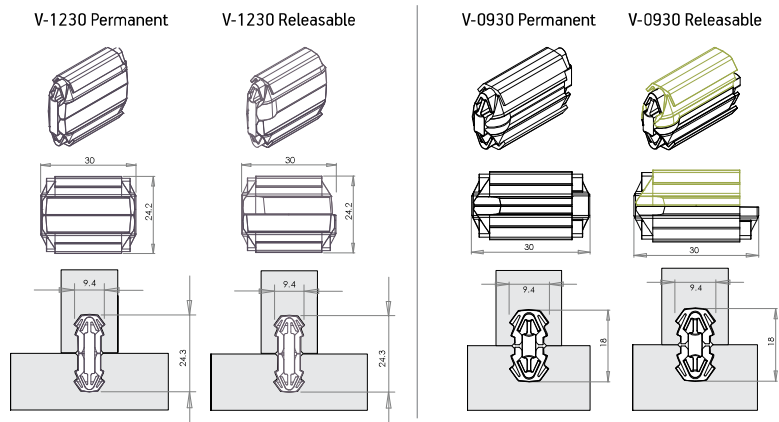

- Solid central rib confers increased joint rigidity
- Single piece housing makes automatic insertion possible
- Innovative dovetail design gives increased shear and tensile strength
- Range of sizes extends the range of materials in which OVVO® can be used

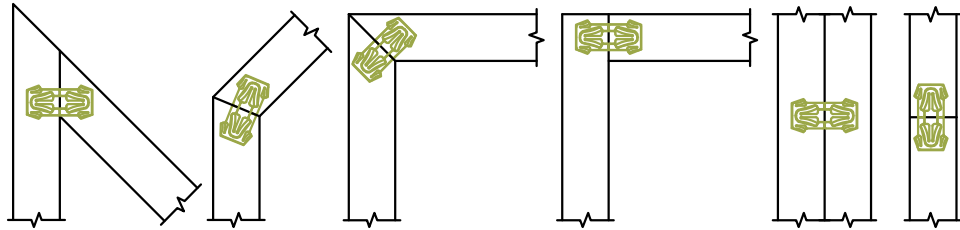

Item Code	Description	Sales Unit
<b>V-0930 Range</b>		
OV101	V-0930 Starter Pack Contains 100 sets x V-0930 Releasable Connection, 100 sets x V-0930 Permanent Connection, 1 x 12.7mm (1/2") Carbide Cutter, 1 x Wood Sample	Ea
OV105	V-0930 Releasable (Pack of 300)	Ea
OV106	V-0930 Permanent (Pack of 300)	Ea
OV108	V-0930 Carbide Cutter	Ea

### V-1230 Range (Replaces 1240 Range)

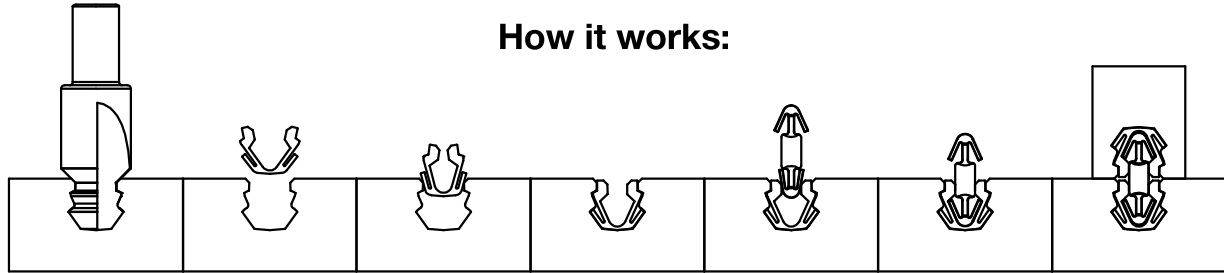

OV110	V-1230 Releasable Connector	Ea
OV111	V-1230 Permanent Connector	Ea
OV112	V-1230 Solid Carbide Cutter with 12mm Shank	Ea

**No Tools  
No Screws  
No Glue  
Simply Push  
& Click**

### How it works:

#### OVVO® for ready to assemble furniture

The OVVO® Connection System eliminates hours of frustration that comes with flat pack assembly. There is no more need for tools, glues or screws. The action is simple. All you have to do is press them together and wait for the 'click' which indicates that the joint has been made.

#### OVVO® for cabinet assembly

Preparation of traditional panels and carcasses is much faster and simpler using the revolutionary OVVO® Connection System. Ship flat-pack, ready to assemble on site. From production through to installation, the end to end process is significantly more efficient and cost-effective.

#### OVVO® for frame assembly

Unique applications such as fitting frames together or joining prefinished architrave and skirting can be achieved easily by using the OVVO® Connection System. Simply connect each piece together and the job is done. No need to tack or fill!
