Citterio Giulio

Quality, precision, punctuality

Citterio Giulio's origins lie in farming country in Brianza, Italy, in the recovery years after WWII, when hundreds of small workshops sprang up, then quickly became industrial units. Since 1945, their entire manufacturing process has taken place in Italy, in the Renate plant, still in the heart of Brianza.

Founder Citterio Giulio has been designing and manufacturing furniture handles and knobs for more than 75 years. Initially, he worked with the only materials available post-war; wood and horn. Later, he moved onto bakelite and galalith, creating effects like ivory, amber and tortoiseshell.

In the 1960s, as the company became Citterio Giulio e Figli s.a.s., they introduced furniture components like mirror frames, coat hooks and small tables in solid brass. Later in the decade, market indications prompted a focus and specialisation in handles of zamak alloys, and the current company was born – Citterio Giulio S.p.A.

Citterio Giulio now offer products in zamak, solid brass, plastic, nylon, polycarbonate, iron, aluminium and stainless steel.

The organisation combines a solid production facility with 60 employees and cooperative partnerships with external workshop-based craftsmen, thus Citterio Giulio is able to produce small quantities as required by customers on short delivery schedules.

Thanks to this long experience, Citterio Giulio are now considered a leading hardware supplier in the kitchen and bathroom market. They export from Italy to 22 countries around the world, and style and elegance remain their passion.

Aalto

Like the early work of renowned architect Hugo Alvar Henrik Aalto, whose buildings feature in Milan's Piazza Alvar Aalto, our Aalto range features solid, functional shapes.

Our Alvar handle range is identically shaped, minus the textured panel that adorns the face of Aalto handles.

Aalto

- Available in 160mm, 192mm and 320mm hole centre options
- Available in Dull Black, Titanium Bronze, Natural Bronze and Matt Antique Iron

Barolo

In Monferrato, Piedmont, there is a small village, where Barolo, considered one of Italy's greatest wines, is produced. Strictly controlled, Barolo bottles even have a numbered government seal to prevent counterfeiting!

This region is covered in long, straight rows of grape vines, which the grooves in our Barolo range of handles and knobs remind us of.

Barolo

- **D Handle:** Available in 160mm and 320mm hole centre options
- **Knob:** Available in a 30mm diameter option, with a 18mm fixing

Francesco Knob

Gaziano

Gaziano is a stylish handle and round knob on simple, slim spindles. With a pleasing circular detail on the face, it's available in four of our most popular finishes that suit the slightly retro feel of the Gaziano style.

Looking for something a little more solid looking? Gaziano Otto adds a circular base with octagonal feature to both the handle and knob.

Gaziano

- **D Handle:** Available in 160mm, 192mm and 320mm hole centre options
- **Knob:** Available in a 30mm diameter option, with a 10mm fixing
- Both items available in Dull Black, Titanium Bronze, Matt Antique Iron and Natural Bronze

Grammichele

Built in 1693, Grammichele, a town in Sicily, is built with a distinctive hexagonal street layout.

This inspired the naming of our Grammichele handle range which unashamedly wears a charming hex nut feature.

For those that prefer a more streamlined look, our Sirmione range is the same shape as Grammichele, minus the hex nut detail.

Grammichele

- **D Handle:** Available in 128mm and 160mm hole centre options
- **Knob:** Available in a 35mm square option, with a 16mm fixing
- Both items available in Dull Black, French Bronze, Natural Bronze, Matt Antique Iron and Black Antique Iron

Pompeii

An ancient city located near Naples, Pompeii was buried under metres of volcanic ash and pumice in the eruption of Mount Vesuvius in AD 79.

It was a wealthy town, with fine public buildings, luxurious private houses and many classical works of art. It is this that inspired the name of our traditionally stylish Pompeii knob.

Pompeii

- Available in a 34mm diameter option, with a 20mm fixing
- Available in a 30mm diameter option, with an 18mm fixing
- Available in Dull Black, Titanium Bronze, French Bronze, Natural Bronze, Matt Antique Iron and Black Antique Iron

Resegone

The Resegone, a mountain range not far from the makers of our handle range, is so named as it bears a resemblance to saw teeth, with eleven roughly equal peaks.

Our man on the spot suggested Resegone for our bar handle range as the knurled texturing reminds him of his local mountains.

Resegone

- **Bar Handle:** Available in 160mm and 320mm hole centre options
- **T Knob:** Available in a 65mm option, with a 16mm hole

Scalzi

The Ponte degli Scalzi is one of only four bridges in Venice to span the Grand Canal and translates as 'bridge of the barefoot', apt for a pedestrian bridge!

Designed by Eugenio Miozzi, the current Ponte degli Scalzi is a single arch bridge made entirely of Istrian stone. Its slenderness and elegant combination of arch and angles inspired the name for our Scalzi range.

Scalzi

- Available in 160mm and 320mm hole centre options
- Available in Dull Black, Titanium Bronze, Natural Bronze, Matt Antique Iron and Black Antique Iron

Sirmione

One of Italy's best preserved castles is situated in Sirmione on the shores of Lake Garda.

Built in the 13th century, Scaligero – or Sirmione – Castle is a fortress with awe-inspiring square turret towers that inspired the naming of our Sirmione range.

For a handle in this shape with additional detail, try our Grammichele handle and knob range.

Sirmione

Striatus

Striatus is truly unique; the first 3D-concrete-printed footbridge built entirely without masonry or reinforcement!

Striatus featured prominently at the Venice Architecture Biennial until November 2021. Its sweeping curve and elegant simplicity inspired the name for this range.

Love the shape of Striatus but looking for texture? Look at our Vecchio handle range.

Vecchio

The Ponte Vecchio is a medieval stone closed-spandrel segmental arch bridge spanning Florence's Arno River.

The name translates as 'old bridge' which prompted the naming of our Vecchio handle, which is the same underlying shape as our Striatus range, but with a beautifully textured panel on the face that brings an aged look.
