By Tanova

TANOVA

ENHANCING LIVING  
SPACES TOGETHER

## Fit are proud to design and develop the Tanova range right here in New Zealand

Tanova bin systems offer space-efficient storage and waste solutions for all areas of your home. Bins slide away out of sight, yet are easily accessed when needed. Our bins are hygienic and easy to clean, with many models having a top mounted cover that acts as an odour-minimiser when the unit is closed. **We carry extra buckets and lids in stock so, if they get lost (yes! it does happen) or damaged, you are able to purchase replacements.**

Multiple bin configurations offer excellent solutions for sorting/storing recyclables and organic kitchen waste, and Tanova even offers a Bokashi unit for indoor storage and transformation of food scraps into a garden ‘superfood’. (And no, it’s not stinky!)

View our full range of kitchen waste and laundry solutions on our website.

### A note about Tanova & New Zealand Made

All Tanova models are designed and assembled in New Zealand, and use New Zealand fabricated and powder coated frames. Models that use 20L and 36L buckets/baskets (excluding TDS2 models) qualify for the New Zealand Made license. These models are marked with a tick in the New Zealand Made column throughout this book.

# The Tanova Waste Family

## Tanova Designer Series

- Fully integrated cushioning system for consistently soft closing and smooth-running drawer slides for effortless opening and closing
- Heavy duty 60kg carrying capacity
- Sturdy handles on buckets for easy bin removal
- Handles also hold liners in place and stay attached (so you don't lose them like other liner holders)
- Strong, easy clean cover doubles as storage shelf if mounted lower in cabinet
- Contemporary Umbra Grey/Charcoal combination, plus Classic White for many models
- 70mm overextension runners extend further beyond edge of benchtop to allow for easy removal of rear bucket
- Models for cabinets from 300mm to 800mm wide, some with category-leading capacity for cabinet size
- Streamlined design for easier cleaning

## Tanova Designer Series 2

- Soft Close and Soft Close with Push to Open models
- Innovative 'everactive' push to open means you can open the drawer just a bit more even if already open
- Comes complete with with premium slimline Simlead D drawer (185mm), drawer back, base panel sides and buckets
- Solid-steel powder coated frame with front-fixing points to provide support for the drawer front
- Heavy duty 70kg carrying capacity
- Models in Classic White and in Umbra Grey/Charcoal combination
- Models for cabinets from 300mm to 700mm wide

## Tanova Simplex

Our top selling range, Tanova Simplex fits snugly into most standard cabinet sizes for good stability. The Simplex system runs smoothly on ball bearing slides and its compact size maximises space efficiency. Its heavy duty bin carriage is manufactured from 1.2mm gauge steel for strength and durability.

- Soft close as standard
- 45kg carrying-capacity ball-bearing slides
- Strong easy-clean cover which can be used as a shelf if mounted lower in cabinet
- Solid folded and welded door bracket
- Contemporary Umbra Grey/Charcoal combination
- Some models also available in Classic White
- Some models available with Push to Open function

### Drawer Type

The drawer type allows access to bins with a single action and is the most popular type of system. The front panel is mounted directly onto a very strong carriage that opens like a drawer.

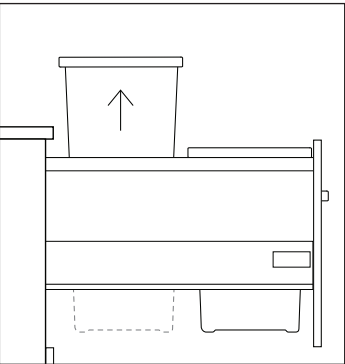

### Handle Type

Mounted behind a hinged door, this model requires an extra 10mm in width and top hinge needs to be a minimum of 150mm from top of the cupboard door (unless sufficient clearance is made for the hinge).

### Rear Bucket Clearance

Most Tanova models provide a minimum of 55mm clearance from front of cabinet to back of rear bucket/basket. Many models provide a greater clearance.

Cabinet widths are external measurements allowing for 16mm board on either side

## Tanova Simplex Plus

All Simplex Plus models run on soft close undermount runners. Simplex Plus is comparable to the Simplex system in terms of quality, but is designed for wider cabinets of 400mm and 450mm.

- Economical, solid and simple bin frame with 15L, 18L and 24L waste bucket options
- Drawer front connection with adjustment
- Its compact size maximizes space efficiency and its snug fit ensures stability
- Heavy duty bin carriage is manufactured from heavy gauge steel for added strength and durability
- 35kg carrying capacity

### Unique Feature

Handles on the buckets are designed to hold liner bags in place

## Tanova Simplex Drawer Inserts

Tanova's Drawer Frame Inserts are ideal for retrofitting as they fit into most existing drawer brands.

- Unit comprises frame to sit into existing drawer plus plastic bins
- Solid steel frame with front-fixing points to provide support for the drawer front
- Minimum internal drawer depth (front to back) of 470mm
- Drawer front adjustment for a good fit
- When 550mm runners are used, bins clear drawer above for easy removal
- All models come complete with standard lids
- Models available that are compatible with LEGRABOX M drawers and others with LEGRABOX F drawers

## Silver Lining: Alternatives to Using Plastic Bags to Line Your Kitchen Bin

Single use plastic bags have been legislated against and, while changing our habits can be challenging, it's certainly nice to see fellow shoppers carrying bright and breezy fabric bags or hemp bags, or even old-school woven baskets!

Even though plastic bags didn't even exist before the 1960s, many have become quite dependent on using those single use plastic supermarket bags to line their kitchen bins, so . . . what now? If you search 'alternatives to plastic bags' in your chosen search engine, you'll find a myriad of options, but here are just a few thoughts:

- Try paper bags (preferably with as high a recycle content as possible)
- Try folding your newspapers to line your bin; online you'll find instructions for a few ways to do this
- If you purchase bulk goods like rice, flour or pet food in large bags, use them
- Purchase bin liners from the supermarket; there are options available that are degradable or compostable, generally made from corn starch
- Go naked! Do you really need a bin liner? Most pull out kitchen bins have multiple buckets so you can easily separate food scraps from recyclables. You can then take recyclables to your outdoor recyclables bin, put food scraps on your compost heap (or feed the chooks, or give them to a neighbour for their compost). And, by the way, the buckets in Tanova pull out kitchen bins have a very smooth inside surface so they're easy to wipe out.

## Useful Tips & Info

### Paper and cardboard:

Recycling is better than composting, and composting is better than landfill.

### Shop-bought bin liners: What do the labels mean?

**Bio-based, plant-based, corn-starch or PLA:** Bags are made from plants, not fossil fuels, but they are still plastic.

**Certified compostable:** Bags will break down in hot composting conditions (this is not the same as breaking down in the environment or in landfills).

**Certified home compostable:** Bags will break down in a home compost bin.

No compostable plastic breaks down in the marine environment.

**Oxo-degradable and oxo-biodegradable:** Bags are made from fossil fuels and have an additive that makes them break down quickly, but they break down into microplastic and are generally considered worse than standard plastic bags.

**No access to composting** and worried about food scraps getting smelly? Keep them in the freezer until rubbish day!

---

*"As a designer, I appreciate the wide range of [Tanova] bins available for just about every application. They work so well, they are my go-to brand."*

***Kitchen Designz, New Plymouth***

Options in classic white and contemporary dark grey hues

"Tanova is always our first stop for kitchen bins/laundry unit systems. The range of widths available covers a larger range over other systems. Tanova use a quality runner system which is easy to install and has easy adjustment for our installation team or client. NZ made is our preferred option for kitchen fittings so these products meet the brief."

"I love dealing with FIT and would encourage anyone who hasn't tried them already to give them a go. They have a huge range of products at a good price and have prompt delivery. We never have any issues with the products and will continue to use them in our joinery. We couldn't be happier with the relationship we have with FIT."

Jennings Joinery, Christchurch

# 1

## FOOD WASTE

Add food waste to your pull out Bokashi bucket, compacting as you go

# 2

## ACTIVATE

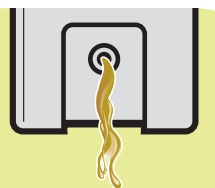

Add Bokashi bran, the 'magical' food and microorganisms that will turn your kitchen scraps into 'superfood' for your garden

# 3

## LIQUID GOLD

Use the handy tap to drain out Bokashi fluid every 2-3 days

# 1

## DILUTE

Add water to the fluid from the Bokashi by Tanova bucket

# 2

## FEED YOUR GARDEN

Dig the bucket contents into your soil and spray the diluted liquid onto plants

# 3

## WATCH YOUR GARDEN GROW

The Bokashi mix provides powerful, concentrated nutrients and accelerates garden growth

# BOKASHI

COMPOSTING SYSTEM BY TANOVA

Bokashi by Tanova, a convenient pull out composting system that turns food waste into garden superfood. Responsible, safe, sustainable . . . and rewarding too!

- Easy to use, hygienic kitchen based system
- Comprehensive; ALL food waste, even meat and dairy
- Airtight lid creates anaerobic (no oxygen) fermentation; so no icky odours
- Faster than traditional composting
- Reduces food waste to landfill: Australian estimates are that 4 million tonnes of food ends up as landfill, enough to fill 8,400 Olympic sized swimming pools! Estimates are that 229, 000+ tonnes of New Zealand landfill waste is food, and that 50% of that is avoidable.
- Saves money: New Zealand estimates suggest it costs more than \$870 million per year to dispose of avoidable food waste to landfill, and the Australian government calculates that food waste costs the economy \$20 billion per year.
- Adds the good stuff back into your soil
- Reduces your household's carbon footprint and contribution to greenhouse gas pollution

TANOVA BOKASHI FOOD WASTE MANAGEMENT

# Tanova Designer Series

## Soft Close Bokashi Unit for 400mm Cabinets

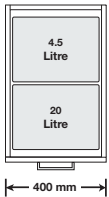

TANOVA

**DID YOU KNOW** around a third of the world's food is never eaten? That means wasted resources used and excess greenhouse gases created to make food that is thrown away. A Bokashi unit turns food waste into a useful garden product.

- Quiet and soft closing thanks to fully integrated cushioning system
- Effortless opening and closing on 60kg rated super smooth running drawer slides
- Over-extension runners extend further beyond edge of benchtop to allow for easy removal of rear bucket
- Strong, easy clean cover doubles as storage shelf if mounted lower in cabinet
- Tall sided frame
- Streamlined design for reduced grime build up and easier cleaning
- Available in contemporary Umbra Grey with Black Bokashi bucket
- Supplied with 2 x 20L buckets with taps (one in the unit and a spare for when your first bucket is full, and the mix is hard at work fermenting to turn into your garden superfood)
- Also comes with 1 x 4.5L Bokashi Mix storage bin, 2 compacting tools, 2 drainer cups and 1 pack of Tanova Bokashi Mix to get you started

ITEM CODE	DESCRIPTION	SPACE REQUIRED FOR INSTALLATION			
		W	H	D

BOKMIX	Bokashi Mix, 1kg bag				

\*Overall actual height of assembly is 413mm

For best results and reliability in the Tanova Bokashi unit, we recommend using only Tanova Bokashi Mix

Responsible. Safe.  
Sustainable. Turn your  
food waste into a  
garden 'superfood'

"I love my inbuilt Bokashi system so much. The bucket design is awesome with the tap at the bottom and not having to pull the buckets apart (which is the system I have used before). And having the Bokashi mix all nicely tucked in at the back in its own little container is pure design genius. Everyone needs one in their kitchen!

I love that I can care about my food waste while still maintaining a beautiful looking kitchen by not having things sitting on my bench or in my pantry. 10 out of 10!

Have already told my mum to get one in her new kitchen, and anyone else who comes to check mine out always gets a demonstration."

Asha Frost, Homeowner, Katikati

# Ventilated Drawers

- Funky modern look
- Ideal for use in all household and light commercial drawer storage; pantries, sculleries, laundries, kids’ play rooms, offices, health and education facilities, salons, garages and more!
- Solid bottom prevents drawer contents from falling through
- Designed for installation behind hinged doors or as feature in open fronted unit
- Sizes to fit popular cabinetry dimensions
- 2 cabinet widths, 2 cabinet depths, 3 drawer heights
- Mounted on quality King Slide soft close ball bearing drawer runners
- 25kg load capacity for 350mm runner (390mm deep cabinet)
- 34kg load capacity for 500mm runner (500mm deep cabinet)
- 1.0mm gauge electrogalvanised steel
- Powder coated in off white (matches Harn and Tanova white) or Coal Dust grey
- **Talk to us about pricing on custom colour from the Dulux range**

## Tanova Laundry with Plastic Hampers

With options in both Designer and Simplex specs, Tanova laundry systems with recyclable plastic baskets provide a durable, lightweight hamper with sturdy built in handles for easy carriage between wardrobe, bathroom, laundry and clotheslines.

- Stylish and svelte 36L capacity hampers designed and manufactured in New Zealand
- Blue and white options depending on model
- Ergonomically shaped and positioned handles for comfy, easy lifting out of drawer system
- Vented on sides for airflow and breathability
- Solid bottom prevents drips into cabinetry

## Tanova Laundry with Steel Baskets

Tanova laundry produces systems with powder coated electro-galv steel baskets in Designer, Simplex Plus and Simplex specs.

- Electro-galv steel baskets
- Strong, durable and rigid
- Powder coated in Classic White
- 50L, 65L and 100L basket options, depending on cabinet size
- Optional top frame cover
- Optional basket divider assists with pre-wash sorting
- Solid bottom prevents drips into cabinetry
